

Design Rationale :

1. Project Purpose

FitAvatar AI is designed to act as a personal AI fitness coach, delivering real-time visual and auditory feedback during home workouts to ensure correct exercise posture and minimize injury risk.

2. UI & Visual Hierarchy

High Contrast Cards: Dark display cards for camera feed contrast, paired with crisp white summary cards for quick readability while moving.

Typography: Clear Sans-Serif font hierarchy with bold key levels (e.g., Target, Duration) to allow users to scan crucial info at a glance.

Color System: Primary blue actions paired with accessible grays to maintain focus on the core exercise experience.

3. User Experience Flow

The 10-screen journey guides users seamlessly from initial assessment through live interactive coaching, form detection, and post-workout summary tracking.
